2009 Sub-Provincial Population Estimates

Provincial Estimates

Between July 1st 2008 and June 30th 2009 British Columbia's population grew by 1.6 per cent, which represents an increase in the population of 71,362 persons.

Sub-Provincial Estimates

Understanding population change at the sub-provincial – i.e., regional and municipal – level is vital to provincial and local government planning processes. BC Stats produces sub-provincial population estimates using the Generalized Estimation System (GES). The system uses symptomatic indicators - e.g., residential electrical connections and health registration information – to estimate change in population.

Regional District

Twenty-five of 29 regional districts showed positive population growth between 2008 and 2009. Squamish-Lillooet, containing the communities of Squamish, Whistler, Pemberton and Lillooet, had the highest growth rate over this period at 3.6 per cent, gaining a total of 1,362 individuals. Greater Vancouver Regional District (GVRD) had the highest gains in absolute terms as 45,285 more persons called this area home in 2009. The GVRD typically attracts the bulk of immigrant landings to the province: According to Statistics Canada sources, between 1998 and 2008, 89% of immigrants ended up in the GVRD. The Fraser Valley and Capital Regional Districts accounted for an average of 4% and 2% respectively over this period.

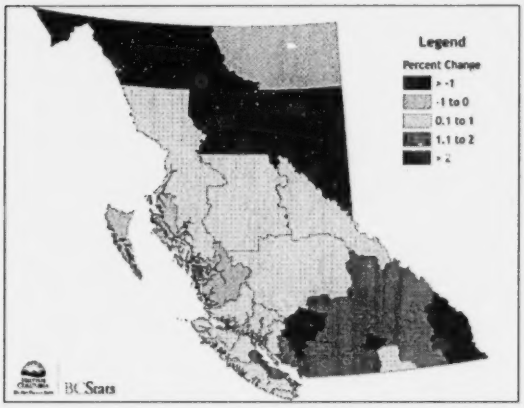
[1] The Northern Rockies RD is comprised of the newly incorporated Northern Rockies Regional Municipality along with a small unincorporated population

The two northernmost regions of the province, Stikine and Northern Rockies, had highest percent drop in population at 4.9% and 1.0% respectively, while Skeena-Queen Charlotte had the highest absolute drop in population at 183 persons.

Regional District Population Change



Municipal

Estimates of population are available for 189 BC municipalities and unincorporated areas. There were 161 incorporated municipal areas in 2009 that accounted for 3,939,980 or 88.4%, of the total provincial population; the 28 unincorporated areas contained a total of 515,227 (11.6%) persons.

Of the 161 municipalities, 122 showed positive population growth between 2008 and 2009, six showed no change and 33 had population declines. When we consider the areas showing growth, it becomes evident that size does matter. For municipalities above the 2009 median[2] population of 4,448, 91% showed population growth, while for those below the median only 60% showed growth.

[2] The population estimate at which half the 161 municipalities have a greater population and half have a lower population.

The City of Vancouver had the largest absolute gain in population at 12,171, with Surry a close second with an increase of 12,053 people.

Notes

Whenever possible we use **seasonally adjusted** data which removes normal seasonal variations to reveal the underlying trends in the data. Adjusted data are identified as Seasonally Adjusted or SA.

Some series subject to irregular fluctuations are presented on a **three month moving average** basis. All such series included in this report are also seasonally adjusted. Where space is limited these are tagged 3MMA SA.

Series not labeled as seasonally adjusted are unadjusted or raw. Some unadjusted series in this report are explicitly identified as such.
